VOL. 12 NO. 43 | Lancaster Farming, Saturday, September 23, 1967 | $2 Per Year

## Manheim Makes A Change In Their Fair Date

A conflict of information on the starting date for the Manheim Community Fair was cleared this week, when Howard Swan, chairman of the fair, said, "it starts Wednesday, October 11 with the annual parade".

Originally, the dates had been sent out as being a week earlier but when the fair committee learned that this conflicted with New Holland Fair they made a quick change to a week later. However, the Department of Agriculture in Harrisburg, to whom the earlier date had been given, had already printed their fair list and sent it out. So the published reports conflicted with the dates on the fair catalogue.

But now it's stright. The Manheim Community Fair will be held Wednesday, October 11 through 13. Lancaster Farming plans to give a full schedule of events nearer fair time.

## Enrollment In Beef Club Set

County Agent M. M. Smith this week announced the deadline for enrollment in the 4-H Baby Beef Club to be **no later than September 30.**

In a letter addressed to all 4-H Baby Beef Club members Smith said,

"Since there is need for some decisions in buying our steer calves prior to our October 5th meeting at Rohrerstown School, (please note this change of date) we are asking that you complete this card and return it to this office by no later than September 30.

"In the meantime, your Club Leaders and myself will be trying to engage some of the very best steer calves that we can find of all three breeds. We are making many contacts for calves but will need to know how many

(Continued on Page 7)

## Farm Calendar

**Saturday, Sept. 23 (Today)**
9:00 a.m.—4-H District Horse Show at Ludwig's Corner.
**Monday, Sept. 25**
1:00 p.m.—Cutting to Fit Workshop, United Gas Improvement Co.

8 00 p.m.—Lancaster County Extension Executive Committee meeting at Farm Credit Bldg.
**Wednesday, Sept. 27**
Ephrata Fair begins (see complete list of events on page 9)

(Continued on Page 8)

DOUBLE WINNER. Kay Weaver. 16-year-old daughter of Mr. and Mrs. Jason L. Weaver, Quarryville R2, won both the grand champion showmanship and the grand champion fitting awards Thursday afternoon at the Quarryville Fair Baby Beef show. Kay was also the best showlady last year. L. F. Photo

## Swinehart, Thompson & Weaver Win At Beef Show

A black FFA Baby Beef named "Smoky," won the over-all grand championship Thursday afternoon, in the Solanco Fair Steer Show held in the Community Park.

The Angus bred at Bel Air, Md., was the best steer in the FFA division for Donald Swinehart, son of Mr. and Mrs. M J. Swinehart, Quarryville R1.

Reserve over-all grand champion was also an Angus shown by James Thompson to the top of the 4-H show. James is the son of Mr. and Mrs John P. Thompson, Oxford R1.

The FFA reserve grand champion was shown by Joe Linton, Quarryville R3, a Hereford, and the 4-H reserve grand champion was a Shorthorn shown by Larry Landis, Quarryville R1.

Kay Weaver, 16-year-old daughter of Mr and Mrs. Jason L Weaver, Quarryville R2, was a double winner, taking both the grand champion showmanship and the grand champion fitting awards. Kay was the best showlady last year.

The list of winners follows **4-H Angus,** 1, James Thompson, Oxford R1; 2, Kathy Wea-

## Australian IFYE Youth Finds People Friendly

An Australian youth visiting a local dairy farm family has found the people he has met in the United States to be "very friendly" These were the words used by Maxwell Allan Correy, 24-year-old son of Mr and Mrs. Gordon Richard Correy, Calcarra Via Toodyay, Western Australia, when asked for impressions of our country Correy is a 1967 IFYE exchangee who stayed a few days last week with Mr. and Mrs Wilbur Kraybill and family, Elverson R2

In comparing Kraybill's 125 acre dairy farm with farming in his home area, Correy found things quite a bit different. At home his family lives on an 1800 acre farm with 1625 acres tillable They have 3,000 Merino sheep and 15 to 20 steers

The temperature never gets below 40 degrees and rainfall totals only 18 inches per year coming in a six month period from May to October.

They rotate wheat, oats, barley and pastures

**Of special interest is that wheat yields only 23 bushels per acre but they only sow 40 pounds of seed because of the low rainfall *conditions and little use of nitrogen. Therefore they still have a profitable yield considering the small amount of capital invested.***

Forty percent of Australian land is in the tropic zone The average farm has between 2,000 to 2 500 acres that could be bought for 50 to 100 dollars. If you wanted virgin land that needed to be cleared or bush) you could have that for 6 to 7 dollars per acre

They never get frost in Correy's part of Australia This gives them insect problems the frost would take care of. So, they burn the stubble fields Each set of farm buildings has a fire barrier at least 10 feet plowed around them for protection

(Continued on Page 9)

## Preston LeFever Wins Tractor Driving Contest

A seventeen-year-old dairy farmer won the grand championship in the tractor driving contest at the Quarryville Fair Thursday morning.

Preston LeFever, Quarryville R3, won first in the open competition Second was George DeLong, Peach Bottom R2; third, Everett Kreider Jr, Quarryville R1, and fourth, James Esbenshade, Quarryville R2

In the FFA division, Glenn Kreider, Quarryville R1 was first; second, Glenn Sollenberger, Quarryville R1, and third, Kenneth Mellinger, Quarryville R2.

Amos Rutt served as chairman for the contest

## Thirty 4-H Horsemen Going To District Show Today

Thirty members of the Lancaster County 4-H Horse Club will be competing today in 69 classes at the District 10 4-H Horse Show to be held at Ludwig's Corner along Route #100 about 3 miles north of the Downington Interchange of the Pennsylvania Turnpike. Show time is 9 00 A M

All Lancaster County club members that earned this honor at the County Roundup are expected to participate.

AUSTRALIAN IFYE YOUTH VISITS LOCAL FARM FAMILY. Maxwell Correy, (right) from a 3000 head sheep farm in Australia was the guest of Wilbur Kraybill and family, Elverson R2, last week. The Kraybills major in dairying but could make their visitor feel at home with these two pet sheep tied in the orchard. L. F. Photo

# Weekly Poultry Report

## Eastern Pennsylvania And New Jersey Weekly Review

**Hens**

Prices of both light and heavy type hens unchanged; however, in instances, slightly higher bids were reported on heavy type in effort to secure needs. In instances, colored hens reported moving in a range of 8-9c. Offerings of light type noted increasing in New Jersey while about steady from other areas. Demand improved slightly in some quarters. Offerings of heavy type fully adequate overall; however, in instances, held with confidence. Prices paid at farm: Light Type Hens 4-6 mostly 5½-6c. Heavy Type Hens 11-12c.

**Turkeys**

Demand improved slightly in some quarters from smaller processors as they book needs for ice pack fresh supplies for approaching Hebrew holiday period in early October. Offerings ample for needs with sales reported within a wide range of 22½-25c on hens and 20½-23c on toms due in part to size of sale and labor involved in loading. Movement under contractual agreements continues heavy and limited only by availability of labor for processing. Sales too limited to report price.

## Fogelsville

(Prices paid dock weights, cents per lb., except where noted).

Hens, light type, 4½-10½, mostly 5-5½; Hens, heavy type, 5½-14, mostly 8-12; Pullets, 19-46, mostly 28-34; Roasters, 12-28½, mostly 18-26; Ducks, 15½-31½, mostly 20-30; Rabbits, 15-32, mostly 15-20; Guineas, 52½-60, mostly 55-58; Pigeons (per pair), 67½-1.70, mostly 72½-75; Jumbo Squabs, 85-87½.

Total Coops sold, 887.

## Eastern Shore Exchange Weekly Review

Broiler and fryer live prices averaged 12.95 cents per pound this week. Prices paid during the week ranged from a high of 13.6 cents per pound on Monday and Tuesday to a low of 11.7 cents per pound on Thursday. Sample sales for the week totaled 728,700 down 200,400 from last week.

## ● Chicago

(Continued from Page 2)

with 20,800 last week and 22,600 last year. Twelve market receipts 169,500, compared with 189,200 last week and 176,000 last year.

SLAUGHTER STEERS — Prime 1150-1425 lbs Yield Grade 3 and 4 28 00-29 25, six loads at the latter price on Monday with late sales largely 28.-00-28.75. Few loads Prime 1600-1900 lbs. Yield Grade 5 24 00-25 00. After Tuesday, High Choice and Prime 1150-1400 lbs 27 50-28 25, Choice 1150-1350 lbs. Yield Grade 2 to 4 26.75-27.75, Choice 900-1150 lbs 26.25-27 25, Mixed Good and Choice 25 50-26 75, Good 25 00-26 00, Standard and Low Good 23 50-25 00.

SLAUGHTER HEIFERS — High Choice and Prime 900-1025 lbs. 26 25-27.25, load Prime 1075 lbs. 27.50 on Monday. Choice 800-1000 lbs. Yield Grade 2 to 4 25 00-26 75, largely 25.00-26.25 after Tuesday, Mixed Good and Choice 750-900 lbs. 24.25-25.50, Good 23.50-25.00, Standard and Low Good 22.00-23 50.

COWS — Late sales Commercial 15 50-17.00, Utility 16.00-17.50, few High Yeilding Utility 17.50-18 00, Canner and Cutter 14.50-16.50.

BULLS — Utility and Commercial late 19.50-22.00.

## ● Vintage

(Continued from Page 2)

CALVES 720 — The largest supply of vealers this season sold active and fully steady with instances $1.00 higher on Good and Choice. Supply included around 20 percent Standard to Choice 125-250 lb. vealers with the bulk being 70-100 lb. Cull.

VEALERS — Choice 40.00-42.-50, several 43.00-44.50; Good 38.-00-41.50; Standard 35.00-39.00; Utility 28.00-35.00; Cull 24.50-28 00, 70-90 lb. 21.00-25 00, few 55-70 lb. 17.50-21 50.

HOGS 140 — Barrows and gilts steady.

BARROWS AND GILTS — US 1-2 190-225 lbs. 22.00-22.50. One lot US 1, 203 lbs. 23 00. US 1-3 190-230 lbs. 21.25-21.60. US 2-3 215-260 lbs. 20.00-20 50. US 1-2 140-180 lbs. 20 00-20.75.

SHEEP 41 — Spring lambs mostly steady.

SPRING LAMBS — Choice 60-90 lbs 24.00-26.50; Good 22.-00-23 50; Utility 18.50-21.00.

**HOGS**

In the Saturday, September 16 sale, 338 head were sold, 160-180 lbs, 18 75-20; 180-200 lbs, 20 10-22 60; 200-220 lb., 20 50-22 50; 220-240 lb., 20.10-22 35; 240 lb up, 17-21 25. Sows 13-17.-25.

# From Where We Stand . . .

## A Meeting Of International Neighbors

We spent about 45 minutes looking in on a bit of heart warming international relationship last week, when we visited with Wilbur Kraybill and his Australian IFYE guest, Maxwell Correy. Our report of the visit is on page 1 of this issue.

Obviously, Wilbur and Max had developed in a few days a mutual respect and friendship that went deeper than a casual acquaintance Though their farming methods and practices were as far apart as their farms, yet the interchange of ideas and cultural background created a deeper understanding of peoples beyond the oceanic fence rows.

We left with a warm feeling of friendship for the foreign visitor. Yet we could not help but wish we had even more of this personal type international interchange. If all people could learn to know individual neighbors from around the world as Wilbur and Max learned to known each other, it would be impossible for nation to rise up against nation as we now have it

At least that's the way it looks from where we stand

★ ★ ★ ★

## Like Mother, Like Daughter?

As reported last week, Susan Kauffman's 4-H junior yearling, Penn Springs Bill Topper is doing well at the shows. She won district honors at Hershey, and then went on to Harrisburg to win in the Junior Dairy Show, The State Black and White Show and the Pennsylvania All American.

*Of special interest is that show* winning runs in Topper's family. Her grand dam won enough credits to be picked All Pennsylvania Junior Yearling (same age as Topper) in 1958 The dam had Reserve All Pennsylvania in 1964 as a junior calf

Now with all of Topper's winnings it could be a case of like grandmother, like mother, like daughter

At least that s the way it looks from where we stand

## The Hidden Profit-Maker

Agricultural limestone is an inexpensive yet a basic mineral which is a foundation for productive farmlands. Fields that are low in pH have a poor foundation for producing high yields. *Lime is an investment to increase profit through greater production and should* be applied whenever soil test indicate a need. This should be in each crop rotation.

The Nation's farmers are using only about one-third of the 80 million tons of liming material soil specialists and agricultural leaders say they should each year. One of the reasons many attribute this to is the fact that the crop response to liming is not readily apparent as it is with such fertilizers as nitrogen. After the initial application of lime — and it must be enough to meet that field's particular need — it costs no more to keep the pH at any desired level 6 5 or 7.0 than it does to keep them at a lower pH such as 6.0 And for most crops the more nearly neutral field (pH 7.0) are, the most productive Many fields have a pH below 5 9 and should be raised to at least 6 5 If this is done the farmer can expect 5 more bushels of corn, 7 more bushels of wheat and 0.8 more tons of alfalfa per acre according to the National Limestone Institute. Using the value of oats at .75 cents per bu., corn at $1.00 per bu , and alfalfa at $20.00 per ton and the yield increases above, in five years from ten acres using a crop rotation of 2 years in alfalfa, two years corn and one year in oats, total increase in crop value is $472.50.

If the soil test revealed a need of 4 tons of lime per acre and lime cost $6.00 per ton delivered and spread, the cost of liming this 10 acre field would be $240. This is only about one-half of the increase in crop value over a 5 year period. Rather than letting the yields gradually slip back to the lower levels, an application of one ton of lime in every rotation will keep the soils productive and yield $472 50 in each succeeding 5 year period.

Which farmer can afford not to lime properly and to keep the pH at the correct level? Lime is the built-in hidden profit-maker

At least that's the way it looks from where we stand.

## Across The Fence Row

Somehow or other, as we get older, *work seems a lot less fun, and fun seems* a lot more work" — Rex Goldthrope, Cuba City (Wisc ) Tri-City Press

"It now looks as though the taxpayer will be the first of America's natural resources to be completely exhausted" Fred W Grown, Edgewater, (N J ) Bergen Citizen.

Then there is this bit of conversation

"I'm sorry I can't pay my installments this week."

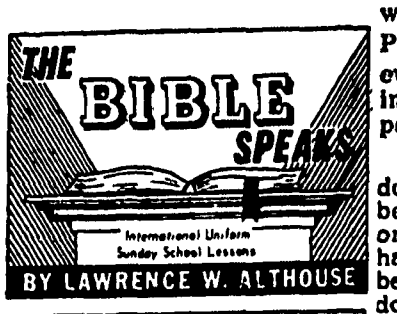
"But you said that last week and the week before"

"Yes, and didn't I keep my word?"

## Weather Forecast

The temperatures for the five day period Saturday through Wednesday are expected to average below normal Daytime highs to be mostly in the 60's and night lows in the 40's in the north section and 50's in the south Cooler the first half of the period then becoming milder Normal high is 75, normal low 53

Rain may total greater than one-half inch in most sections, coming in the first half of the period.

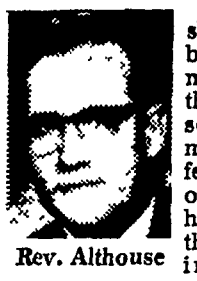


## ON THAT DAY

**Lesson for September 24, 1967**

Background Scripture: Acts 28 17 31.
Devotional Reading Philippians 1 12 21.

On May 19, 1780, the Connecticut House of Representatives was in session in Hartford. It was one of the most eerie days in New England history. One chronicler called it "a terrible foretaste of Judgement Day."



Rev. Althouse

At noon the skies turned from blue to grey. By midafternoon they had become so black that many people, fearing the Day of God's Wrath had come, fell to their knees and implored his mercy.

In the House of Representatives all was confusion. Some men fell to their knees while others called for immediate adjournment. Then, Colonel Davenport, the Speaker of the House, rose to his feet and a momentary hush came over the room as he spoke: "The Day of Judgement is either approaching or it is not. If it is not, there is no cause for adjournment. If it is, I choose to be found doing my duty. I wish, therefore, that candles may be brought!"

### THE LAST GLIMPSE

Paul encountered some of this same difficulty during his own ministry. The people of Thessalonica, he learned, had stopped working and were simply waiting in idleness for the return of Christ, something they supposed to be imminent. Paul's letters to them instructed them to get back to work, so that when the day of Christ's return did come, they would be found faithfully doing their tasks.

Paul's own life provided a shining example. In the last chapter of Acts, we leave Paul in Rome. The writer of Acts does not finish the story, perhaps because he assumed his readers knew it or because Paul was still working when Acts was written. The last glimpse of Paul that is given to us, however, is that of a man continuing his work heedless of the possible lateness of the hour.

When the chapter closes, Paul does not know what his fate will be. He might be freed, imprisoned, or even executed. Whatever happens, however, Paul would be found, like Speaker Davenport, doing his task.

### TYPICAL OF PAUL

We see a scene that had been repeated many times in Paul's life. "When they had appointed a day for him, they came to him at his lodging in great numbers" (Acts 28:23 RSV). The only difference now was that they came to his house, Paul evidently under house-arrest. Once again as many times before, Paul expounded the good news, "testifying to the kingdom of God, and trying to convince them about Jesus both from the law of Moses and from the prophets." Inevitably, "some were convinced by what he said, while others disbelieved." So it had been wherever he had gone. So it is with us even today: some response, some rejection.

Apparently, even in those days there was a great back-log of court cases awaiting trial, for two years later and Paul had still not been tried. Our last view of him, then, is typical for Paul: "And he lived there two whole years at his own expense and welcomed all who came to him, preaching the kingdom of God and teaching about the Lord Jesus Christ quite openly and unhindered" (Acts 28: 30, 31 RSV).

### TO LIGHT A CANDLE

Poor Paul! Working right up to the end. Never getting to retire and enjoy a pension. No little bungalow in Florida. True, he probably wasn't making tents any more (his profession), but the preaching and teaching of Christ and the kingdom was something he could not lay down. In that dark age, Paul's mission was to light candles, not curse the darkness.

Harry Lauder used to say: "I could tell where the lamplighter was by the trail of light he left behind." So it was with Paul: one could follow his trail of light throughout Europe and Asia and he was still lighting candles when his Master came to take him home.

Where will you be and what will you be doing on that day?

*(Based on outlines copyrighted by the Division of Christian Education National Council of the Churches of Christ in the U S A Released by Community Press Service)*

## NOW IS THE TIME . . .

**By Max Smith**

**Lancaster County Agent**

**To Attend Corn Field Days**

The Harvey Sunday Farm located near Carlisle in Cumberland County will be the scene of the Pennsylvania Corn Field Days on September 28 and 29 This appears to be a very educational event for all corn growers, there will be many exhibits and demonstrations stressing the suggested methods of all phases of corn production and utilization Since corn is a very important crop on nearly every farm, we strongly recommend that local farmers attend at least one of the above days.

**To Eradicate Rodents**

We read numerous articles lately about the federal government getting into the rat eradication program, we strongly recommend that all rats and mice be exterminated but it is equally important for every land and property owner to undertake this program themselves and not depend upon the federal government The starting point is a good sanitation program followed by the use of poison baits and poisonous gases

Milking cows should be kept away from oak trees at this time of the year if there is an acorn crop Experience has showed that cows will eat the acorns if given a chance, regardless of the amount of other pasture crops Acorns will reduce or stop the milk flow from most cows and they will not regain it during the present lactation.

**To Enroll In 4-H Beef Project**

Rural boys and girls interested in feeding a baby beef as their 4-H Club project this coming year should enroll by the first of October Two clubs are active in Lancaster County: one in the New Holland area and the other as a county-wide club (Red Rose), interested youth 9 to 19 years of age are requested to enroll through one of their local 4-H Club Leaders or contact the Agricultural Extension Office, 202 P. O. Building, Lancaster.

STEER FEEDERS...

problems associated with cattle going on feed

Digestive disorders and a slight transient depression in appetite in newly-arrived cattle in the feedlot have been problems for a number of years. There are numerous causes:

1. The sudden change in type of feed, for example, from grass and milk to grain, silage and/or hay and a protein supplement.
2. Too rapid pushing of grain concentrates.
3. Too much protein
4. Not enough roughage.
5. Too much high quality roughage.
6. Unpalatable feed.
7. Too much green chopped legume or grass silage.
8. Feeding soft or immature corn. If not moldy, soft corn is satisfactory, but animals must be accustomed to it gradually (Morrison).
9. Too much green chopped corn causing green corn poisoning.
10. Too much silage fed to lighter weight calves. Calves do not have the digestive capacity to obtain their total digestible nutrients from a full feed of silage alone.
11. Digestive disorders caused by infections.
12. In addition, in connection with supplements containing an antibiotic, there is an adjustment of the rumen microflora to the antibiotic. This may cause a slight depression in rumen function and reduce appetite for 24 to 36 hours after the initial feeding. Softer feces also may be noticed. This effect is transient and after 36 to 48 hours the appetite should be restored to normal.

For a successful and profitable steer feeding program designed to minimize these problems contact any Miller & Bushong Service Representative or call us direct at Lancaster, 392-2145.

HOLSTEIN GRAND CHAMPIONS AT THE QUARRYVILLE FAIR. Edgefield Bonnie Jean (right) owned and shown by Kenneth Rutt, Quarryville R2, was the grand champion of the open show. This homebred two-year-old has milk credits of 2-ly 120d 5,581m 4.3% 255f. On the far side is Groffdale General Sunlight, shown by 12-year-old Sharon Groff, daughter of Mr. and Mrs. Robert Groff, Quarryville R3. Sunlight, also a two-year-old, was fresh about ten days and already milking 55-60 pounds per day. L. F. Photo

## Two-Year-Olds Successful At Solanco Show

Every grand champion in the 18th Southern Lancaster County Community Fair this week, was a two-year-old except one In the largest dairy show ever staged at the Quarryville event, 67 showmen paraded their entries on the community park lawn Wednesday afternoon, for judge Jonas Gruver, York Co. It was the first time an open show had been featured.

J Robert Book, Kirkwood R1, set the pace for the Guernsey open show by taking top honors with his Blakeford Nances Bellflower two-year-old heifer that stood 11th at the All American show at Harrisburg last week. Bellflower was fresh January 4, 1967 and has produced 10,279 pounds of milk and 465 pounds of butterfat in 260 days.

Book teamed with Stanley Graver, Lancaster R7, for reserve grand champion.

In the junior division, Audrey Wagner, daughter of Mr and

## ● Two-Year-Olds

(Continued from Page 6)

Mrs. Charles H. Wagner, Quarryville R2, was top. Audrey showed her homebred two-year-old, Char-Lea Farm Effie that was fresh July 17.

Reserve in the junior division was a three-year-old shown by Scott Mull, Quarryville R1.

**Holstein**

The final round of the Holstein division put Amos Rutt's first place age cow and his son Kenneth's top two-year-old in the ring together. Again judge Gruver went to the two-year-old, making the age cow reserve. Edgefield Bonnie Jean, the open grand champion was bred by Ken and has produced in 120 days, 5.581 pounds of milk and 255 pounds of butterfat with a 4.3 percent test.

The Rutt's live at Quarryville R2.

Groffdale General Sunlight, another two-year-old was grand champion of the junior Holstein show for Sharon Gorff, 12-year-old daughter of Mr. and Mrs. Robert Groff, Quarryville R3.

The Sunlight heifer was fresh 10 days and already milking 55-60 popnds per day.

Only one Ayrshire was entered in the show, but she was a two-year-old, shown by Marvin Miller of Strasburg.

Stephen Arrowsmith, Peach Bottom, won both the grand and reserve grand championships in the Jersey show. An aged cow was grand and a junior calf was reserve.

The list of winnings are:

**Guernsey**

**Junior calf,** 1, Diane Crider, Nottingham R2; 2, Randy O'Connell, Kirkwood; 3, Vernon Preston, Oxford R2; 4, Earl Mull, Quarryville R1. **Intermediate calf,** 1, Jay Hastings, Kirkwood; 2, Robert and Joyce Wagner, Quarryville R2; 3, J. Robert Book, Kirkwood; 4, Scott Mull, Quarryville R1; 5, Elizabeth Preston, Oxford R2. **Senior calf,** 1, Charles Wagner, Quarryville R2, 2, J. Robert Book. **Junior yearling,** 1, J Robert Book; 2, Dennis Allen, Quarryville R2, 3, Larry Wagner, Quarryville R2. **Senior yearling,** 1, Allen Crider; 2, Scott Mull. **Two-year-old,** 1, J Robert Book and Stanley Graber, Lancaster R7; 2, Scott Mull **Aged cow,** 1, J. Robert Book, 2, Earl Mull

we need of each breed by the above date Please help us by returning the card promptly one way or the other, if you are not going to re-enroll, then write this fact on the card and return it to us

If you know of any new members that want to join our club this coming year, please get this information to your Club Leader or to me by the same deadline."

**WHY SHOULDN'T YOU STICK PINS INTO AN ELECTRIC HEATING PAD** or blanket to keep it in place? Because the pin may go through the insulation and come into contact with the wires in the pad You may get a shock or burn from the pin.

**The new star in the calf growing program**

**NEW PURINA CALF GROWENA**

Purina's New Calf Program brings you extra energy in Purina Nursing Chow, higher energy and lower fiber in Purina Calf Startena, and an all new Purina Calf Growena.

It can help you grow herd replacements fast, breed them early, and freshen them between 22 and 24 months—and help you take advantage of future high milk prices.

**What's new about the program?**

Based on recent findings that show heifers need increased protein and energy during their first six months, Purina has developed NEW Calf Growena. This is a 16% protein ration with an improved protein-energy balance. It's fortified with essential minerals and vitamins. And it's coarse—the way young calves like a ration to be.

The new Purina Heifer Growing Program is better because it now satisfies the growing heifer's needs for protein at the time when she needs it most.

It's time to start your calves on the NEW Purina Calf Growing Program featuring New Calf Growena. Stop in and talk to us about it. You'll find us where you see the Checkerboard sign.

# Martin Attends Two Day Milk Conference

Daniel L. Martin, director of Inter-State Milk Producers' Cooperative, and fieldmen, Charles E. Cowan and Andrew Marvin, attended a two-day conference in Philadelphia. They studied the current milk marketing situation affecting federal and state orders.

Conference activities included possible solutions to milk procing problems, and a complete r view of various types of mar eting programs in operation t day.

Dr. James E Honan, general manager of Inter-State, moderated the program for the directors and fieldmen on federal orders, cooperative mergers and federations, and Class I pricing

Dr. Paul E. Hand, economist for Inter State, and A. Evans Kephart, Inter-State counsel, discussed cooperative laws, and dairy imports, milk pricing and milk quality control were included in the two-day sessions, in relation to the demand for the product and the exodus of today's farmers from the agricultural scene

Golden W Davis, management assistant, reported on problems surrounding milk procurement in the four-state market area

Fieldmen from four states reported on milk marketing problems as they exist today in their respective areas

F Bennett Carter, president of Inter State, presided over the two-day conference.

Wean at 3 weeks -- get 50 lb. pigs at 9 with

WAYNE TAIL CURLER ROCKETS

Yes, that's what the new Wayne-Tail Curler Rockets did for typical early weaned pigs at the Wayne Research Center.

Pigs go for the tasty new Tail Curler Rockets. (3 to 1 over a creep feed formerly considered very palatable.) They get top nutrition from choice ingredients, carefully balanced and fortified to meet the critical needs of baby pigs.

Tail Curler Rockets contain Complex 65, Wayne's Aureomycin, Sulmet and Penicillin combination that gives the difference you can see!

If you don't care to early wean, Tail Curler Rockets will pay off as a pre-starter.

Remember every pound of creep ration eaten means a pound heavier pig at weaning, and a head start that lasts all the way to market.

## ● IFYF Youth

(Continued on Page 7)

Before coming here Correy spent three months in Kansas. After visiting other farm families in Pennsylvania he will be leaving for New York, November 6.

While in the United States Correy would like to learn about Agricultural Extension work (it's role in the community development and the 4-H Structure and programs); Other farmer organizations (cooperatives, clubs, etc.) and Agricultural practices (pasture and range management, wheat production and sheep production).

The International Farm Youth Exchange is an exchange program of 4-H alumni and other young adults of the United States with rural youth of other countries. IFYE is conducted by the National 4-H Club Foundation in behalf of the Cooperative Extension Service of the State Land-Grant Universities and the U. S. Department of Agriculture. Since its beginning in 1946, 69 countries have participated in the program with the United States. In 1967, approximately 200 young people and 35 countries will participate in the exchange.

The 1967 exchange with Australia is in cooperation with the Australian Council of Rural Youth. Two delegates from the United States are visiting Australia, while two exchanges from Australia are visiting the United States.

Correy's exchange is made possible through financial sponsorship of local 4-H, business and civic groups in cooperation with national sponsorship by the Ford Motor Company Fund.

## Extension Board To Meet Next Tuesday

The next meeting of the Lancaster County Agricultural and Home Economics Association Board of Directors will be held on Tuesday evening, September 26, at 8:00 p.m., in the basement room of the Farm Credit Office, West Roseville Road, Lancaster, according to Evelyn J. Hess, secretary.

"Decisions regarding plans for the Annual Meeting of the Association this winter will be made. Also, should discuss the needs for Extension Specialists in Agriculture for winter and early spring meetings. Please give these items some thought prior to this Broad meeting," Mrs. Hess said.

**September 18, 1967**

Calf receipts totaled 135, Choice and Prime 37 50-43; Standard 32-34 50, Good and Low Choice 35-37, Common 18-30. The trend was steady

**ARE NAPHTHA, BENZINE, AND GASOLINE GOOD FOR DRY CLEANING** at home? No They are highly flammable and shouud never be used or stored in the home. Even a spark of static electricity caused by rubbing parts of the fabric together may ignite the fumes, and gasoline can be ten times more destructive than dynamite Avoid home dry cleaning To take out spots, use only a nonflammable type of cleaner Do it where there is plenty of ventilation, preferably out of doors, or the fumes may cause illness.

RONALD RANCK, and his grand champion pen of swine in the Quarryville Fair Thursday afternoon. Ronald is the 15-year-old son of Mr. and Mrs. Lester Ranck, Quarryville R2. He had the reserve championship in 1965. L. F. Photo

# Local Boys In Springfield Judging Contest

Abe Fisher, son of Mr. and Mrs. Abram Fisher, Lancaster R2, Leroy Eshleman, son of Mr. and Mrs. Chester Eshleman, Willow Street R1, and Linford Martin, son of Mr. and Mrs. Walter Martin, East Earl R1, participated in the FFA judging contests at Springfield, Mass. on September 15 and 16. The boys won the trips last June during FFA week at Penn State.

Each boy was placed on a 3 man team. Abe was on the Dairy Products Team which placed 6th out of 12 states and Abe placed 4th individually of out 12 states; Leroy was on the Poultry Judging Team and they placed 7th out of 12 states; Linford judged with the Dairy Cattle Team and they placed 4th out of 12 states. Abe and Leroy are students at Penn Manor High School and Linford is a student at Garden Spot High School.

Mr. Richard Hackenberger, Vo-ag techare at Penn Manor, accompanied the boys on their trip.

John Deere 237 Corn Picker

raises the speed limit in high-yield corn

Shift up! Pick at speeds up to 5 mph, even when yields run well over 100 bushels. Long, tapered gatherers and high inside shield, funnel stalks right in. Even tangled stalks seldom escape three roller-type gathering chains. There's new gathering and snapping speed. And the 237's spiral snapping rolls cut shelling loss in half.

Faster elevators with higher flights move corn up fast. Trash goes too, aided by new rotating trash paddles. New husking rolls — cast-iron spirals against serrated rubber — peel husks, pull trash through. You pick clean. See the new 237 soon Ask about the Credit Plan.

# Poultrymen Invited To Attend NEPPCO-Lancaster Tour Banquet

Lancaster County poultrymen are invited to attend the NEPPCO tour banquet to be held in evening of October 9 at the Plain & Fancy Farm Restaurant at Bird-in-Hand. According to NEPPCO tour coordinator David Hefler, any local folks wanting to attend the banquet will be welcome. Banquet tickets will be sold for $3.50 each.

Local poultrymen will also be welcome to join the official tour, Hefler said, but they will have to get their registration money in promptly. The price for the entire tour — covering modern layer, broiler, and processing operations in Lancaster County, plus lunch, dinner, bus fare and NEPPCO Show registration is $10 The tour will originate at the Farm Show Building in Harrisburg at 10 a.m. on the 9th. and will return there that night. No special stops will be made to pick up or discharge local passengers, Hefler noted.

While tour reservations are on a first-come first-served basis, banquet tickets only may be obtained until October 3rd by contacting Lancaster County Poultry Association president, John H. Hess at New Holland Supply Co., New Holland.

Reservations for the tour of Lancaster County's poultry industry is being offered this year as an added attraction to the annual NEPPCO Show which will be held October 10-12. Lancaster County poultrymen are cooperating with NEPPCO in arranging this tour. Reservations for the complete tour should be made with Richard I. Ammon, Executive Director, NEPPCO, 10 Rutgers Place, Trenton.

# Hess Serves As Chairman For Feed Convention

John J. Hess, Paradise Feed Dealer, was the chairman this week for the 89th annual convention of the Pennsylvania Millers' and Feed Dealers' Association held in the Hotel Hershey, Hershey, Pa. His wife headed the ladies program committee. Other local men aiding Hess were Melvin Wenger, Rheems; Nelson Weaver, Lititz and Wilbur Heistand, Salunga.

Featured speakers for the convention was Lt. Gov. Raymond J. Broderick and State Secretary of Agriculture Leland H. Bull. They discussed "Pennsylvania's Role in Organizing for the Future".

# Hundreds Of Corn Hybrid Plots Will Be Featured At Field Days

Persons interested in corn production and harvesting will have an opportunity to inspect hundreds of field demonstration plots, planted under varying conditions at the educational Corn Field Days, Sept. 28-29, at the Harvey P. Sunday Farm in Cumberland County.

A total of 88 acres have been set aside for corn exhibits and demonstrations. In addition, 45 corn research plots were prepared by agronomy demonstrations. In addition, 45 research plots were prepared by agronomy specialists at The Pennsylvania State University.

Sixteen hybrid corn varieties, planted at 18,000 plants per acre and under normal fertility conditions, may be ob-

QUEAMEADE GENERAL FARM AND HOME

This four-week-old black and white baby is to be sold in the Queameade Farms Holstein Sale to be held Saturday, October 7, at the farm located 6 miles south of Honey Brook. The proceeds (total money the calf sells for) will go to the Lancaster County Farm and Home Foundation.

The calf appropriately named for the occasion combines a high test pedigree with milk records up to 17,514 lbs.

At the Farm and Home directors meeting Tuesday evening, in the Agway building, it was announced that the current farm drive for funds has yielded $11,483.65 to date in pledges, with only 20 percent of the 2,800 solicatation cards returned. Of this amount $9,353 65 has been received in cash. The drive will continue with an effort to get all cards in by Oct. 2.

In the photo, Yost is left and B. Snavely Garber, is representing the Foundation. Sale will start at 11:30 a.m. under the direction of Diller and Kreider, Auctioneers.

DOLLAR EFFICIENT SINGLE BEATER

Expect a pocket-saving price. The latest in simple design. See the Allis-Chalmers 140-S spreader for features that mean dollar efficiency. Won't freeze up, but sure chews up that packed frozen stuff and spreads it faster, easier.

You get five feed rate selections. Self-cleaning paddles. Low, wide box speaks for itself. Converts to 140 bushel rear-unloading trailer, too. An all-the-way winner.

Also see the NEW giant 180 bushel size. Or the compact 95. Two Allis-Chalmers farm loaders, too. C'mon in!

# For the Farm Wife and Family

By Mrs. Richard C. Spence, Food Editor

## THE EGG AND YOU

SPENCE

Eggs are one of nature's most nutritious ready-packaged foods. Not only are they especially valued as a source of highest quality protein, they also supply ample quantities of vitamins A and D, so important during the growth periods of childhood and adolescence.

If someone in your family is dieting, remember that all the good nutrition in an egg is contained in only 77 calories. For those wanting to gain weight, rich egg drinks are tasty snacks with fine food value.

USE EGGS AT PEAK GOODNESS — For the best flavor and cooking quality, use eggs within a week after purchase. After long storage they may get an "off flavor" and they may lose some thickening and leavening power.

Put eggs in the refrigerator as fast as possible after you buy them They will lose as much freshness in a few hours in a hot car or kitchen as they will lose in a week in tre refrigerator

Leftover egg yolks should be covered with cold water and refrigerated in a tightly covered container Extra egg whites should be stored in the refrigerator in a tightly covered container. It is best to use leftover yolks and whites within a day or two.

Leftover egg yolks make a good custard; use 2 egg yolks for each whole egg in custard recipes. Extra egg whites combine well with whole eggs in scrambled eggs and souffle and are handy for meringue. Egg whites may also be used in icings, candy, chiffon desserts and of course in white cakes.

Yolks poached hard and pressed through a sieve or potato ricer make a colorful topping for salads, casserole dishes and green vegetables.

* * *

ABOUT CHIFFON DESSERTS — In chiffon desserts, egg whites act as an aerator; they help increase the volume and make texture light. If you want a light, fluffy chiffon dessert, how do you go about making it?

Here are a few suggestions:

Air must be beaten into the egg whites and retained in preparation of the product. Egg whites whip more easily and give greater volume at room temperature than when first taken from the refrigerator. For best results, whip egg whites until they are stiff, but not dry. When egg whites are at their "peak", they stand in peaks, moist and glossy.

When combining beaten egg whites with other ingredients, use a folding, not a stirring motion. Mix only enough to blend ingredients well.

* * *

**ORANGE CHIFFON PIE**

1 baked pastry shell, 9-inch
1 tablespoon unflavored gelatin
½ cup cold water
4 egg yolks
½ cup sugar
6-ounce can frozen orange juice concentrate
¼ teaspoon salt
4 egg whites
¼ cup sugar

Make pastry shell and let it cool. Soften gelatin in water. Beat egg yolks in the top of a double boiler until light; then beat in ½ cup sugar. Add the orange juice concentrate and salt. Cook over boiling water, stirring often, until thickened. Remove from heat. Add softened gelatin and mix well. Cool. Beat egg whites until foamy. Then add ¼ cup sugar gradually, beating constantly until soft peaks form. Fold into orange mixture. Pour into pastry shell and chill until set. Serve with whipped topping or whipped cream.

NOTE: Use only clean, sound eggs in this recipe.

**MERINGUE SHELLS**

3 egg whites
¼ teaspoon salt
¼ teaspoon cream of tartar
¾ cup sugar

Preheat oven to 250 degrees (very slow). Beat egg whites until foamy. Add salt and cream of tartar. Beat until soft peaks form. Add sugar gradually, beating constantly, and continue beating until very stiff peaks form. Shape meringue into six mounds on heavy brown paper on a baking sheet. Using the back of a spoon, form a hollow in the center of each mound. Bake 1 hour. Turn off heat and let meringues cool in oven. Serve filled with ice cream or fruit or both.

NOTE: One teaspoon lemon juice may be used instead of cream of tartar. Add it after the sugar has been beaten into the egg whites.

**Calroies per meringue shell**— About 105.

**Variation:** Meringue pie crust — Spoon the meringue mixture into a 9-inch pie pan, heaping it around the edge to form shell. Bake as above.

**MACARONI AND CHEESE SOUFFLE**

1 cup cooked elbow or 1-inch macaroni
4 well beaten egg yolks
½ teaspoon dry mustard
⅛ teaspoon pepper
1 cup process cheddar cheese spread
4 stiffly beaten egg whites

Chop macaroni fine. Preheat oven to 350 degrees. Grease a 1½ quart casserole. Combine macaroni with egg yolks, mustard, and pepper. Soften cheese spread over low heat. Add gradually to macaroni mixture, stirring constantly. Blend well. Fold in egg whites. Pour into casserole and set in a pan of hot water. Bake about 35 minutes, or until set.

Calories per serving — About 215. To reduce calories to about 155 per serving, use only ½ cup cheese spread. Blend ¼ cup skim milk or reconstituted nonfat dry milk with the cheese before adding it to the macaroni mixture.

## For The Farm Wife

(Continued from Page 14)

**Menu Suggestion** — Serve with cold cuts or sausage cakes and a salad of shredded carrots, diced apple, and raisins. Have ice cream for dessert.

* * *

**EGGS STUFFED WITH CRABMEAT**

6 hard-cooked eggs
¾ cup crabmeat
½ cup chopped celery
1 teaspoon dry mustard
½ teaspoon salt
⅓ cup mayonnaise or a mixture of: 2 tablespoons mayonnaise, 2 tablespoons instant nonfat dry milk, 1 tablespoon water
Few grains paprika

Cut eggs in half lengthwise. Scoop out yolks; mash. Remove any cartilage from crabmeat and break the meat into small pieces. Combine crabmeat, egg yolks, celery, mustard, salt, and mayonnaise or mixture of mayonnaise, nonfat dry milk, and water. Mix well. Fill egg whites with crabmeat mixture. Sprinkle with paprika.

**Calories per serving** — About 185 if filling is made with mayonnaise; 145 if made with mixture of mayonnaise, nonfat dry milk, and water.

**VARIATIONS:**

**Eggs stuffed with chicken** — Substitute 1 cup finely chopped cooked or canned chicken for the crabmeat. Reduce mustard to ½ teaspoon and mayonnaise to ¼ cup. About 200 calories per serving.

**Eggs stuffed with ham** — Substitute a 2¼ ounce can of deviled ham for the crabmeat. Omit salt, mayonnaise, and paprika. About 120 calories per serving.

# Farm Women News

**Society 18**

Society of Farm Women 18 met Sept. 16 at the home of Mrs. Arnold G. Lueck, 513 Pleasure Road, Lancaster, at which time it was voted to give $10 to the United Campaign and $60 to the Home and Farm Foundation.

It was also announced at the meeting that on Sept, 21 the society served a light snack at the Lancaster County Home.

A banquet of husbands and wives of the society will be held on Oct. 21 at Meadow Hills Dining House.

The county convention will be held Nov. 4 at Dutch Town and Country Inn.

At the next meeting on Tuesday, Nov. 21, Mrs. John N. Hess, Columbia R2, will be the hostess.

**Society 12**

Society of Farm Women 12 met on Sept. 16 at the home of Mrs. Leroy O'Donel, Conestoga. Devotions were in charge of Mrs. George Kneisley.

A miscellaneous food and bake sale was held. The annual family night banquet will be held Oct. 21, at West Willow Fire Hall. A film of wild life will be shown.

Reservations are being taken by Mrs. Donald Lownsbery, Conestoga R2.

**Society 21**

Society of Farm Women 21 will have Mrs. Ray Strawser show slides of Europe at the Oct. 12 meeting to be held in the Quarryville Fire Hall beginning at 6:30 p.m. with a covered dish. Members of Society 22 will be entertained at this time.

Announcement was made at a recent meeting with Mrs. Clair DeLong, Mrs. John Long and Mrs. Charles Tindall Sr., as hostesses.

During the September meeting conducted by Mrs. Howard Steinberg, president, committee reports were given.

Chaplain Ray Strawser showed his coin collection during the program. The meeting was held at the home of Mrs. James Shank, Quarryville. Mrs. Parke Ressel and Mrs. Willis Rineer were co-hostesses.

**Society 19**

Society of Farm Women 19 met Sept 16 at the home of Mrs. Gerald Noll, 440 Centerville Rd., Lancaster, with Mrs. Clarence Newcomer as co-hostess.

Mrs. Daniel Rohrer led the devotions.

The Society donated $10 to the Needlework Guild and $50 to the Farm and Home Center.

Amos Herr gave an illustrated talk on his trip to Spain and Portugal.

It was announced at the meeting that a food stand will be maintained at the Edith Rohrer Farm Sale, Colebrook Rd., Manheim R1, on Oct. 7.

The next meeting will be held Oct. 14, at which time the group will take a Dutch tour of Lancaster County.

**Society 3**

A meeting was held Sept. 16 in the AkronFir e Hall by members of Society of Farm Women 3. Mrs. Edgar K. Binkley and Mrs. Paul Weidman were hostesses. Mrs. Binkley had devotions.

Mrs. Esther Petticoffer conducted a memorial service in memory of Mrs. Elva Fogleman,

## Ladies, Have You Heard? . . .

**By Doris Thomas, Extension Home Economist**

THOMAS

**Use Laundry Appliances For Most Washables**

Even if your washer and dryer aren't equipped with cycles for new fabrics and finishes, you don't have to wash these garments by hand.

Wash garments in small loads using cool or warm water for the wash cycle.

Wash only long enough to remove soil, then rinse in cool water.

Shorten spin cycle after both washing and rinsing.

Dry these garments in an automatic dryer at low or medium temperature. Then let tumble for about 10 minutes, using just air setting without heat.

Remove clothes from dryer at once and hang or fold for storage.

**A Good Rule For Broiling**

Place thick cuts of meat and meats to be cooked well-done farther from the heat than thin cuts or those you want only rare or medium rare.

**Check Furniture Construction Before Buying**

Before you buy furniture, examine it closely to see how it's constructed and what ma-

(Continued from Page 15)

a member who passed away recently. Miss Marian Martin read the resolution of respect.

Donation was given to the United Campaign Fund.

Final arrangements for a food stand at the Ephrata Fair were made Meals will be served four days

For the program, 4-H Club girls from Northern Lancaster County gave demonstrations. Fourteen members of the Jolly Caterers Cooking Club brought cookies to be judged. Judges were Mrs Irvin Burkholder, Mrs Harry Palm and Mrs. Mary Rover

Blue ribbon winners were Betty Bollinger, Ann Bomberger, Sucee Kreider, Dolores Nolt, Grace Markey and Debra Weitzel. Mrs. Harold Fry is leader.

From the Outdoor Cooking Club, six girls gave a demonstration. Mrs. Robert Gregory is leader. Also participating were Lincoln 4-H Sewing Club first year girls Mrs. Harold Stuler is leader. Mrs. Ivan Eberly is leader of the second through fifth year girls. Demonstrations were given on slippers and garments the girls made during the session.

Mrs. Roy Mull nd Mrs. Ernest Hartranft, assistant leaders, also attended along with several of the girls mothers.

The Society presented all 4-H members with gifts. Refreshments were served.

**BOOK CHOICE IMPORTANT**

In the pressure for achievement, don't be guilty of pushing books on a child that are too mature for him, cautions Mrs. Marguerite Duvall, Penn State extension child development specialist This can lead to boredom and a loss of interest Using too many babyish books with narrow interests can have the same effect.

terials were used. Test for rigidly and inspect the finish. Also look for these construction details in quality furniture.

Corner blocks glued and screwed to chair or table rails reinforce corners to increase rigidity.

Table tops fastened to the base with screws or steel clips permit the top to ride as wood swells or contracts. Check to see that table surfaces are flat and evenly finished.

Extension table leaves should fit perfectly and match the rest of the table.

Good-quality furniture has drawers dovetailed or notched on corners. And check to see if drawers slide in and out evenly and smoothly.

Look for doors that close smoothly and fit well. Examine hinges and make sure doors don't sag.

Be sure hardware is carefully detailed, suited to the furniture design, and firmly attached.

**Serve Squash Often**

Many varieties of squash on the market give you the chance to select the type you prefer.

Jade green zucchini, white scalloped patty pan, and yellow summer squash are easy to find at popular prices.

During the fall look for hardy squashes such as the acorn and bell-shaped butternut.

You can bake, boil, or steam squash.

Serve squash with other vegetables especially those of the cabbage family — broccoli, Brussels sprouts, cabbage, and cauliflower.

**Some Uses For Nutmeg**

Use nutmeg as a topping for custards and eggnog.

You can sprinkle nutmeg on broiled or fried bananas before you serve them.

Nutmeg adds new flavor to a dish or spinach or Brussels sprouts.

For a special touch, serve such fruits as peaches, fresh or frozen pineapple, seedless green grapes topped with sour cream and sprinkled with nutmeg.

---

The next meeting will be Oct. 21 in the Lincoln Lutheran Church Social Building. A luncheon at noon will have members of Society 4 as guests.

The total-electric home of Mr. and Mrs. T. Eugene Hammer, Lancaster.

We asked the Eugene Hammer family, who converted to total electric living:

**Is it as low-cost as we promised?**

Their answer:

**Yes! We paid just $29.18 a month last year for everything, *including* electric heating!**

This low cost also included electric water heating, cooking, laundering, lighting, and all their other electric services.

That's why we say, to make a true comparison of the total costs of home heat and operating all your work-saving appliances, you must add together *all* costs.

With total electric living, for instance, there's just one service, one bill and no expensive maintenance contracts. But to get the true cost of flame-type heat, you must add together the fuel bill, the electric bill and the service contract. Put them all together and you'll see why we say live the total electric way as the Hammer family does.

IF YOU ARE BUILDING — be sure to tell your builder you want to be modern, you want the best, you want electric heat.

IF YOU ARE REMODELING — call a Reddy Kilowatt Recommended Electric Home Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."

PP&L
AN INVESTOR-OWNED ELECTRIC UTILITY IN THE SERVICE OF THE PUBLIC

## Engine Temperature Affects Efficiency And Economy

Heat is a by-product of energy. In converting fuel to energy, internal combustion engines generate a lot of heat, most of which must be dissipated or the engine would end up a molten mass of iron!

Engines can't run ice cold, however! A certain amount of heat must be retained for the efficient production of energy, advise service engineers of Champion Spark Plug Company. Maintaining coolant temperatures around 160-180 degrees F for liquid-cooled car, truck and tractor engines seems to be ideal for good fuel atomization and complete combustion.

Water jacket temperatures that run too far below or above create problems.

When engines operate on the low side, they run inefficiently from a fuel consumption standpoint and uneconomically as far as internal parts wear is concerned. Unfortunately, particularly in cold weather months, far too many engines never operate higher than 120 degrees.

In that situation, partial combustion is common Raw, unburned fuel works past the pistons and not only dilutes crankcase oil, but wipes essential lubrication from the cylinder walls as well. This hastens cylinder, ring and piston wear. What's worse is condensation in the crankcase that never boils off because of the prevailing low engine temperatures. Diluted and contaminated oil shortens bearing life drastically if allowed to continue.

The number one cause for low engine temperatures is short trip driving where the engine never has a chance to warm up before it is switched off. In the case of farm tractors, it results from using the tractor on light loads where the engine, because of its very large cooling system capacity, never works hard enough to build up proper temperatures.

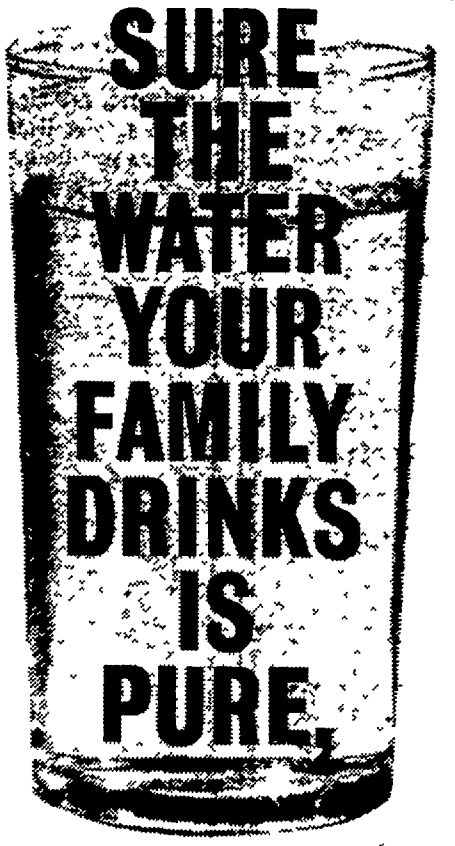
Other causes could be faulty thermostats that are stuck in a partially open position. Naturally, coolant can't be held in the block long enough and therefore extends warm-up time.

Since most vehicles today use warning lights, a low temperature won't show, normally However, symptoms to look for include consistent, poor fuel economy, and spark plugs whose firing tips will have a black or sooted appearance Plugs like these could, depending upon mileage, be cleaned, regapped and reinstalled However, it's possible that in some cases the next hotter spark plug would work satisfactorily to avoid carbon fouling from too cold an engine.

### COMPUTERS AID FARMERS

Using a computer for planning your farm operation is now possible. Contact your county extension agent for further information. It's called farm analysis through linear programming

IF YOU'RE ABSOLUTELY SURE THE WATER YOUR FAMILY DRINKS IS PURE,



DON'T READ THIS AD

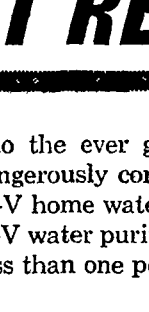
Now, in answer to the ever growing problem of water pollution (most of America's wells are dangerously contaminated), Ultra Dynamics Corporation created the ELENITE U-V home water purifier. Full guaranteed, easy to install, the compact ELENITE U-V water purifier can purify up to 100,000 gallons of water at an operating cost of less than one penny... less than the daily cost of burning a 40 watt bulb.

For over thirty years ELENITE U-V water purifiers have been proved most effective in actual installations by industries, governments, institutions and businesses all over the world.

If you want the security of knowing the water your family drinks is absolutely pure—free of all the water borne disease carrying germs—mail the coupon today for the free booklet "Health Security for Your Family." Read all about the new ELENITE U-V home water purifier developed by the world's oldest and largest exclusive manufacturer of ultra violet purifiers. Read how your family can always have the security of pure, healthful water.

ELENITE WATER PURIFIERS

*Tear out the coupon and send for the free booklet right now. There is absolutely no cost or obligation on your part.*



Gentlemen:
Yes, I want my family to have the security of pure, healthful water. Please send me your free booklet.

# WASHINGTON REPORT

## Congressman Edwin D. Eshleman

16th District—Pennsylvania

One of the most important functions of the Congress is to oversee or act as watchdog over all of its legislative enactments to make sure they are operating properly.

Actually, this might be said to be a two-pronged function. One part of it is to review the laws to refine their meaning and plug any loopholes. The other is to ride herd and supervise the programs administered by the bureaucrats.

This function has taken on a great deal of added importance recently. Many new programs are showing signs of mismanagement or are failing to accomplish the results intended.

The Democratic Majority Leader is the Senate Majority Leader in the Senate, Mike Mansfield, appeared to see the handwriting clearly on the wall in a statement he made late last December. He said, "I would hope to see in the First Session of the 90th Congress the beginning of a major re-examination of what we have done in legislation during the past few years." He expressed the hope that the "rough edges and overlaps" could be eliminated.

How, nearly nine months later, this job remains seriously neglected. In fact, there is a strong feeling in Washington that the savings resulting from a thorough review and evaluation of the various programs could have lifted the threat of a tax increase that we face today.

A prime example of Congressional failure to follow through on supervision of a program arose just recently in the House Banking and Currency Committee Arms scales to other countries, totaling $2 billion, were financed by Export-Import Bank credits without the knowledge of members of that committee, which has jurisdiction over Export-Import Bank affairs

Many other cases of waste and extravagance have come to light in recent times, particularly in the poverty and foreign air programs Yet far too little has been done to restore the proper degree of Congressional control over these programs and to revise their operation and the ways in which they are managed.

One problem is that the Administration too often keeps the facts on the operations of these programs from becoming known to the Congress A rosy hue is put on program activities that actually ought to be exposed to a bright light This is a natural tendency, but it is unfortunate All too frequently, it means that mismanagement must become really scandalous before the truth outs

Several proposals for strengthening the watchdog function of the Congress have my support.

One of those is to establish a subcommittee within each standing committee of the House to investigate and report on the operations of the programs over which it has jurisdiction.

Another suggestion is to designate at least two days each month when committee chairmen and ranking minority members could report to the full House on program operations. A third proposal is to increase each committee's power to obtain full and current information from the executive agencies.

I believe these and similar steps are necessary if we are to keep the Federal government from turning into nothing but a bureaucratic machine. It is vitally important to the taxpayers and to our whole system of government that the Congress assert its rightful role in supervising the programs it sets up.

# $3,000 Paid For Quarter Interest In Jersey Bull

Harrisburg — A quarter interest in Marlu Milad Symbol, a two-year-old Jersey bull, was sold for $3,000 Wednesday (Sept. 13) at the fourth Pennsylvania All-American Dairy Show.

The quarter interest was purchased by Walebe Farms, Inc., of Collegeville, RD2, Montgomery County. The other three-quarter interest in the animal is owned by Key Charm Farms, of Covent Station, N. J., and James Mabry, of Norwood, N. C.

Marlu Milad Symbol was sired by Marlu Milad; the dam was Marlu Stylist Souvenir.

Officials of the Pennsylvania State Jersey Sale said the previous record price was $3,600 pand for full interest in an animal.

Forty animals were sold for a total of $30,540 for an average of $763.50. Last year's average price for 40 animals was $453.25.

Mrs. Katherine Thomas, of Rockville, RD 28, Md., paid $1,050 for a two-year-old bred heifer, Marlu Stylist Advancer Etta. Mrs. Thomas also purchased Marlu Warspite Lassie, another two-year-old bred heifer for $700. The animals were sold by Marlu Farm, of Lincroft, N. J.

Ray A. Metzler, of Martinsburg R2, Blair County paid $875 for a calf, Vaucluse Basil Sylvia. It was sold by Vaucluse Farm, of Newport, R. I.

WHY PAY MORE FOR LESS?

SILAGE ENRICHER

"ALGIT"

A PRODUCT OF THE SEA

Use 5 lbs. Algit to each ton of silage.

1. This prevents "Run Off". (of juices)
2. Keep the silage fresh.
3. Eliminate that certain odor from silage.
4. Increase the nutritional value of silage.
5. Cattle prefer Algit treated silage.
6. The smell which your clothes get in wintertime is eliminated.

Spread on top of load by hand before unloading.

# Swine Producers To Conduct Fall Carcass Show

The Lancaster County Swine Producers Association will be conducting a Fall carcass show and on foot evaluation contest on Thursday, September 27, 1967 in conjunction with the Lampeter Fair.

Anyone who produces swine, either on a purebred or a crossbred program, is invited to participate by entering one of their hogs in this contest. The Kunzler Co. has asked that we limit the contest to 20 head. We will accept the first 20 entries and ask that no farm or herd make more than one entry.

All exhibitors in this carcass contest must be or become members of the Swine Association. Fee $1.00.

Entries in the contest may be either barrow or gilt and must weigh between 190 and 220 pounds to be eligible to compete in this contest. Hogs not in this weight range will be slaughtered and evaluated with the contest entries and all exhibitors will receive a copy of the carcass data when this information is compiled.

The carcasses will be judged by a University Meats Specialist on a basis of han-loin percentage and meat quality, no certification requirements necessary. The Association will award trophies to the Champion and Reserve Champion carcasses ond cash prizes of $10 for first place and a $1.00 depletion per placing on down to tenth place.

All pigs must be at the swine tent on the Lampeter Fairgrounds by 5:30 p. m. on Thursday, Stptember 28, 1967. We will attempt to begin the on foot evaluation at 6:30 p.m. Consignors may watch the cutting and evaluation of the carcasses at the Kunzler Co. Time of the evaluation will be announced at the on-foot show.

Any swine producer wishing to enter a pig in this carcass show should mail the $1.00 entry fee to James Z. Martin, Christiana R1, by September 23. The show is not only for purebred breeders but is an opportunity for all swine breeders and feeders to gain greater "insight of the inside" of the swine they breed a nd feed and to develop the ability of swine producers to choose meaty carcasses on the foot. The evaluation contest to judge the meatiness of the pigs on foot will be open to everyone. Each participants sheet will be scored against the official carcass data. Cash prizes of $10 00, 7.50, 5 00 and 2 50 will be awarded the top four judges.

We hope to hear from you by the 23rd and see you on the 28th.

Sincerely Yours,
JIM MARTIN,,
Secretary.

# Frost Holds The Key To A Record Corn Crop Yield

Frost holds the key to the quality and quantity of Pennsylvania's record breaking corn crop.

If there is no widespread frost for the next two or three weeks, Pennsylvania will have a bin-breaking, 80-million-bushel corn crop, the State Crop Reporting Service says.

Nearly two-thirds of the crop is in the soft stage and will require several more weeks of maturing to be safe from frost. Preliminary reports indicate the corn will be of excellent quality.

Field corn was damaged by frost in Somerset County earlier this month and some sweet corn was nipped in low lying areas in northern and western sections of the state.

The second week of excellent weather helped farmers get caught up on haymaking Some farmers report they have filled their barns and have no place to store their extra hay.

Digging of fall varieties of potatoes is under way The Lehigh County crop is good while in Potter County both the quality and yield are considered very good.

The peach harvest is nearing completion while apples continue to size and color nicely. Grapes are coloring rapidly in Erie County.

---

The bad part about making good is that you have to do it all over every day.

# Don't Be Victim Of Self-Made Farm And Home Tragedies

A farmer recently was refilling his tractor with gasoline. He had left the motor running as he had often done, when a spark ignited the gasoline fumes, causing a terrible explosion that resulted in his death.

**RAIN INTERRUPTED A BACK-YARD** barbecue that parents were giving for their son and a dozen of his friends. They moved the portable barbecue grills along with the guests into the garage. Because of the hard rains and high winds they closed the over-head doors. In a short while several of the youngsters were simultaneously overcome with carbon monoxide and had to be rushed to the hospital.

**A MOTHER RECENTLY CLEANED** the upholstery of two living room chairs with a full cup of carbon tetrachloride. That afternoon, her 5-year-old son sat on one of the chairs while watching his favorite television program. Afterwards he became so violently ill that he was rushed to a hospital and it took an expert medical team and an artificial kidney to save the lad's life.

**THE POTENTIAL HAZARDS IN AND AROUND** most households are overwhelming And countless persons are innocent victims simply because they are not aware of dangers that may exist. Such was the case in the three examples mentioned. The farmer had refilled the gasoline tank on his tractor many times with the motor running, and perhaps he never realized the dangers involved. The parents were unaware that burning charcoal releases deadly carbon monoxide and should never be used except in a well-ventilated area And certainly the mother didn't know that carbon tetrachloride vapors were so extremely dangerous or that they could be given off for such a long period of time after they were used.

**THE UTMOST CAUTION SHOULD ALWAYS BE USED** when pouring gasoline from one container into another since there is always danger that escaping vapors when mixed with air may ignite When it is necessary to pour gasoline, by all means, do it away from open flames, electric switches, heat, and away from engines or motors while they are running or any other possible sources of ignition,

Another dangerous source of ignition is through static electricity, which can be generated through gasoline in several ways It may be generated by pouring gasoline from one container into another without having a metallic connection between the two containers or by filtering gasoline through a chamois.

**THE LATTER PRACTICE SHOULD ALWAYS BE AVOIDED.** In pouring gasoline from one container into another, a simple precaution to follow is to use a funnel which is put in contact with both containers; or, if you are using a hose, the metal nozzle should be kept in contact with the container being filled. Storage of kerosene or gasoline on a farm must be done with the utmost caution. It is unwise to keep them in the house. Never store or handle in glass containers as they are too easily broken. Storage cans should be of the proper type, painted red, if possible, and labeled clearly. Different shapes and sizes should be used for gasoline and kerosene.

**DO NOT BURN CHARCOAL FOR COOKING** or heating purposes indoors or in any enclosed area. When charcoal burns, it produces carbon monoxide, a deadly gas. This gas is invisible, odorless and colorless and it can overcome a person without warning. Many cases of carbon monoxide poisoning have occurred from cooking with Japanese style hibachis indoors; from using grills in basements enclosed porches, garages and living rooms during rainy days or cold weather; and from trying to heat tents, cabins and automobiles with charcoal briquets and unventilated kerosene stoves.

**EXPERTS SUGGEST THAT YOU DO NOT USE** tetrachloride in your home. It is true that it is a common, readily available household chemical. It is also true that carbon tetrachloride is extremely hazardous. Some people regard it as a "safe" cleaning fluid merely because it is nonflammable. Yet, in truth, it is one of the most toxic house hold substances known.

**CARBON TET'S MOST VICIOUS HAZARD** is its vapor, which is far more poisonous than chloroform. And the victim usually has no warning at the time that he is being poisoned. Acute carbon tet poisoning causes kidney failure that is often fatal. Repeated and prolonged exposure can cause destruction of the liver. It is a wise precaution to check all cleaning fluids, fumigants, insecticides, paints and fire extinguishers on the premises for the ingredient carbon tetrachloride and remove any which contains it to a place where they can be locked and only by adults who understand their dangers. Also avoid purchasing any of these products without first checking the labels to make sure carbon tet is not contained in them.

**FARM and HOME ACCIDENTS ARE ON THE RISE.** In the U.S. alone, according to the National Safety Council, the statistical average is — a death every 19 minutes and an injury every eight seconds.

The Council on Rural Health of the American Medical Association continually cautions all to be eternally vigilant so that farm and home accidents may be kept down to the lowest possible.

**UNFORTUNATELY, ACCIDENTS NEVER TAKE A HOLIDAY.**

## Application Methods Of Fertilizer To Change In Northeast

Increasing shortage and high cost of farm and fertilizer industry labor is forcing rapid changes in fertilizer application methods, indicated a Pennsylvania State Universiay agronomist at Pocono Manor this week, at the 10th annual Northeast Fertilizer Conference.

James H. Eakin, Jr., Extension soil fertility specialist, pointed out that the trend from planted fertilization to bulk handling of fertilizers is well underway in the Northeast and will continue. However, he added, the switch will not be nearly as great or rapid as it is in the Midwest because of smaller farms in the northeastern states.

Eakin further predicted that more and more northeastern farmers will abandon planting time application of fertilizer and rely on maintenance of an over-all high soil fertility to promote seedling growth.

He indicated that as labor becomes more scarce and expensive, farmers will continue to look for better, more direct factory-to-field fertilizer movement that requires less and less dealer and farmer handling.

Another Penn State agronomist at the conference, Albert S. Hunter, indicated that with prices of farm land and labor rising at unprecedented rates, farmers are intensifying efforts for greater farming efficiency.

Hunter indicated that higher and higher rates of fertilization are being used to increase production and to substitute for additional land. Many farmers are decreasing row widths, using new and improved machinery and fertilizing in the fall to economizze on work loads at spring planting time, Hunter said. Fall fertilization also allows earlier corn planting which tends to increase yield per acre, he added.

## Good Food And Cover For Wildlife In All Parts Of Penna.

Pennsylvania wildlife is benefitting this year from an unusually great production of food and cover, and this should be good news for Keystone State hunters.

Reports by District Game Protectors indicate that this year's rainfall has resulted in heavy cover throughout the state, and that there is a super abundance of wild grape, wild cherry, beechnut, wild apples, acorns and other food for wildlife.

I addition to "wild" foods utilized by game birds and animals, there has been a good yield among farm crops this year, particularly corn.

An abundance of food and cover usually means a plentiful supply of game, and District Game Protectors report that will be the situation this year. Field reports indicate there will be considerably more rabbits, squirrels, waterfowl and deer available to hunters this fall than during the past several years.

Populations of ringneck pheasants and wild turkeys are as high or slightly greater than in 1966, and grouse and quail numbers are comparable to last year.

Despite last year's near-record bear harvest, the supply of bruins should provide top-notch sport.

Field reports indicate that squirrels are probably the most unharvested small game species, and that the deer herd is at or exceeds comfortable range-carrying capacity.

Some species have widened their ranges slightly throughout the state, but generally follow past patterns in locations of abundance.

All in all, this should be a banner year for Pennslyvania hunters.

## Queameade Has Hay Show First At Harrisburg

**HARRISBURG — A hay sample entered by Russell F. Heilman and Son, Lebanon, RD 4, was judged grand champion of the Southeastern Pennsylvania District Hay Show held in conjunction with the Pennsylvania All-American Dairy Show. The Heilman entry was later-cut alfalfa, heat finished.**

**Reserve champion honors were won by Leon Q. Miller, Tamaqua, RD 1, Schuylkill County. His entry was later-cut alfalfa, field cured.**

**Other winners included: alfalfa, first cutting, Milton Hershey Farms, Hershey; alfalfa grass-mixed, later cuttings, Kenneth Gordon, McConnellsburg, RD, Fulton County; clover, Norman Rothermel, Pitman, RD 1, Schuylkill County; grass, first cutting Queameade Farm, Narvon, RD 2, Lancaster County; grass, second cutting, J. E. Lanius and Son, York, RD 3; annual grasses, John Kraft, Schuylkill Haven, Schuylkill County.**

## Local Dealers Attend New Tractor Field Meeting In Virginia

Local Allis-Chalmers dealers and representatives are just back this week from a new tractor introductory meeting held at Briel Farm at Richland, Va. According to Paul Martin, District Manager, the 11 men representing 6 Lancaster County Dealerships were much impressed with the new tractors.

At the field demonstration the representatives had the chance to work the tractors and get the feel of both gasoline and diesel equipment

Those attending were:

L. H. Brubaker, Lancaster and Lititz, Lester Brubaker, Roy Brubaker, Donald Frank, Harry Shepherdson, Nissley Farm Service, Washington Boro, Pa, Kendig Deitrich, Allen H Matz Farm Equipment, New Holland, Samuel Heisey, Grumelli Farm Service, Quarryville, Tony Grumelli, Clarence Herr, N G. Myers & Son, Rheems, Norman Myers, Chester K Long, Akron, Chet Long, and Roy Buch

## New Act To Help Eradicate Diseases

A new act raising indemnities on diseased animals will help speed eradication of tuberculosis, brucellosis and cholera in Pennsylvania at an earlier date, the State Secretary of Agriculture said today

Leland H Bull said indemnities now are more in line with today's economic conditions than the previous indemnities which had been in effect since 1937

The most significant change in the law is a provision infection as well as for those known to be diseased. In the past, indemnities could be paid only for diseased animals. Secretary Bull said the new measure will make it possible for owners to remove potentially dangerous animals from their herds.

The new act (House Bill 170) authorizes the Secretary of Agriculture to pay indemnities ranging from $100 to $200. The former indemnity was $50.

The new act also authorizes swine, infected with or exposed to hog cholera and which are to be destroyed to control the spread of the disease, be indemnified at actual value for meat, feeding or breeding purposes.

Speedy roof rafters guarantee easy, proper placement of roof panels the first time. Rafters add great strength to the roof. Panels need only to be bolted together in three places. It's another big time-saving feature you get only in Speedy Bar-Lok corn cribs.

**Stands up best—lasts longer**

Wire mesh panels are 5-gauge wire — thick as a ¼" bolt! No bulge or sag. Sturdy 26-gauge galvanized roof is securely anchored to 9 steel roof rafters and side panels. Can't blow off!

Come in today and see the Speedy Bar-Lok corn crib. Let us prove to you that Speedy is twice as fast — twice as easy to erect. Let us show you all the other features that make Speedy Bar-Lok your best corn crib buy.

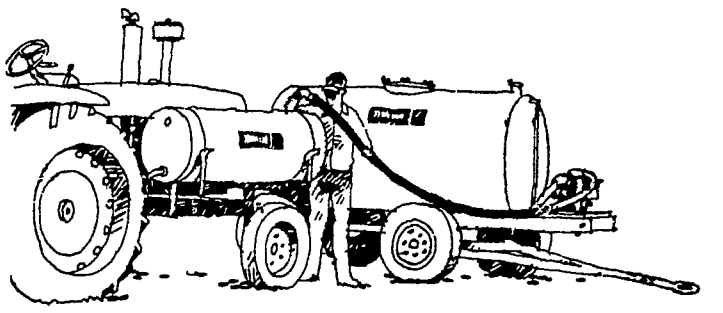
Arcadian Liquid.

Now's the time to seed and feed wheat.



**Start wheat faster with exact prescription-analysis in every drop.** That's why more growers are converting to Arcadian SLF mixed liquid. It doesn't limit you to five or six grades. We prescription mix N-P-K plus minor elements in the exact ratio your wheat crop needs for strong, vigorous growth. It contains new Poly-N® which gives you 100% water soluble phosphorus enriched with new polyphosphates. Gets wheat off to a faster, deep-rooted start. And you also get three forms of nitrogen for fast response plus sustained feeding. You'll like the way Arcadian liquid saves labor. Loading and applying is far easier and faster than dry materials. All you lift is the end of a hose. So unless you enjoy lifting fertilizer bags, try Arcadian SLF liquid. The faster, labor-saving, more profitable way to seed and feed wheat.

# Lancaster Co. To Be Visited By Poultry Tour

A planned bus tour of the biggest poultry attractions in America's top agricultural county is fast becoming a caravan.

What was originally planned as a busload of interested producers out of a view of Lancaster County's most talked about egg and poultry operations has now overflowed into two busloads, according to Richard I. Ammon, executive director of the sponsoring Northeastern Poultry Producers Council.

The tour is being held in conjunction with the three-day annual NEPPCO Exposition in Harrisburg's huge Farm Show Building on October 10-11-12. It is slated to take place on Monday, October 9, just prior to the show.

"We'll continue to take reservations on a first-come, first-served basis," Ammon said. A limit of four buses will be set, he added.

The tour, planned and coordinated by the Lancaster County Poultry Association, will visit a 240,000-layer complex, a giant egg and poultry processing plant, a broiler operation growing out 300,000 birds each year and a broiler hatchery.

And it will also include lunch, a visit to the renown Pennsylvania Farm Museum and an authentic Pennsylvania Dutch feast at the famous Plain and Fancy Farm Restaurant in Intercourse, Pa.

The tour begins and ends at the Farm Show Building. Advance registration is required. The cost is $10 00 per person and includes transportation, meals and admission to the NEPPCO Exposition. Reservation requests together with payment should be directed to NEPPCO, 10 Rutgers Place, Trenton, New Jersey, marked "Lancaster County Tour".

The NEPPCO Exposition is highlighting speakers on a broad range of up-to-the-minute poultry health, management and marketing topics, educational displays, youth activities and scores of commercial exhibits featuring the latest in poultry equipment, products and services.

---

It's okay to speak from the shoulder, but it's much better to start a bit higher.

## Sitler Promoted To Products Manager

Ned Sitler, Jr. has been promoted to the position of Allied Products Manager for the Company. In this position Ned will have responsibility for sales and profit-management and long range planning of the Allied Products Department. The Allied Products Department distributes field seeds, drugs, chemicals, garden supplies, milk products, twines, etc. to retail feed dealers.

Ned Sitler is a graduate of Pennsylvania State University, where he majored in animal husbandry. Prior to joining D. E. Horn & Company, Inc. Ned was an assistant Pennsylvania County Agent. Ned, his wife Shirley and their two children will continue to reside in York County, Pennsylvania D. E. Horn & Company, Inc. manufactures and distributes Hornco Feeds and allied farm products in Pennsylvania, Maryland and New Jersey.

## 58-ACRE LANCASTER COUNTY FARM

## WEDNESDAY, OCTOBER 4, 1967

at 2:30 P.M.

Located 8 miles West of Lancaster, 2½ miles East of Mount Joy, near Elm Tree School, ½ mile Northeast of 230 By-Pass, Lancaster and Elizabethtown bus every hour near by.

NO. 1. Beautiful grand old Colonial limestone home, Walls two feet wide, large colonial round side porch columns, 11 rooms, center hall, 3 fire places, all conveniences, 2-car garage, 2 acre lawn, with area lights and shade, a real old homestead well taken care of, will stand another 150 years.

NO. 2. The farm buildings consist of a large stone and frame bank barn, 125 feet long, also a practically new 3-story cow barn, stanchions and cleanout equipment, tobacco shed, part has cellar, can hang 15 acres, silo, several good poultry houses, and a well of never failing water, excellent horse or stock farm.

NO. 3. A portion of above mentioned farm consisting of 37 acres lays adjacent to south side of macadam road, is also very desirable limestone land, all in high state of cultivation. The land frontage along public road of several thousand feet is quite an asset, would also be a suitable location for a church home or a memorial park, easy access to a number of towns, also water and sewer lines, easily accessible.

Note this property will be offered divided and also as a whole.

Property will be open for showing every Wednesday and Sunday, from 3 to 6 P.M. and on day of sale.

(Continued from Page 13)

served. These 16 plots are 3 to 5 acres in size. Approximately 250 different varieties of commercial corn hybrids have also been planted by corn seed companies.

Two other types of demonstration plots have been established under high fertility conditions. One section, for grain, was planted at 24,000 plants per acre in 20, 30, and 40 inch rows.

Another section, for silage, was planted at 28,000 plants per acre in 30 and 40 inch twin rows. Also, 4 acres of row fertilizer demonstration plots may be compared.

Corn Field Days are sponsored by the Pennsylvania Crop Improvement Association and the Cooperative Extension Service, in cooperation with numerous commercial agricultural companies.

The Sunday Farm is located one mile north of U. S. 11 near New Kingston.

## Baler Attachment Color Marks Bales For Identification

A baler attachment that marks hay or straw bales for easy identification has just been patented by New Holland Division of Sperry Rand Corporation. The device sprays colored liquid on the wire twists that hold bales together. It was invented to stop pilferage, especially where big-scale growers leave hundreds of tons stacked by the roadsides

The attachment is designed to fit right on the bale chamber and doesn't interfere with normal baler operation. It can apply up to three different colors, making possible a large number of combinations. There's no danger to livestock, because the marking colors are completely edible

Branded bales would scare away most highwaymen. But even if they are stolen, bales are readily identified because each grower can select his own distinctive color code.

New Holland's marketing plans for the baler brander attachment are still incomplete.

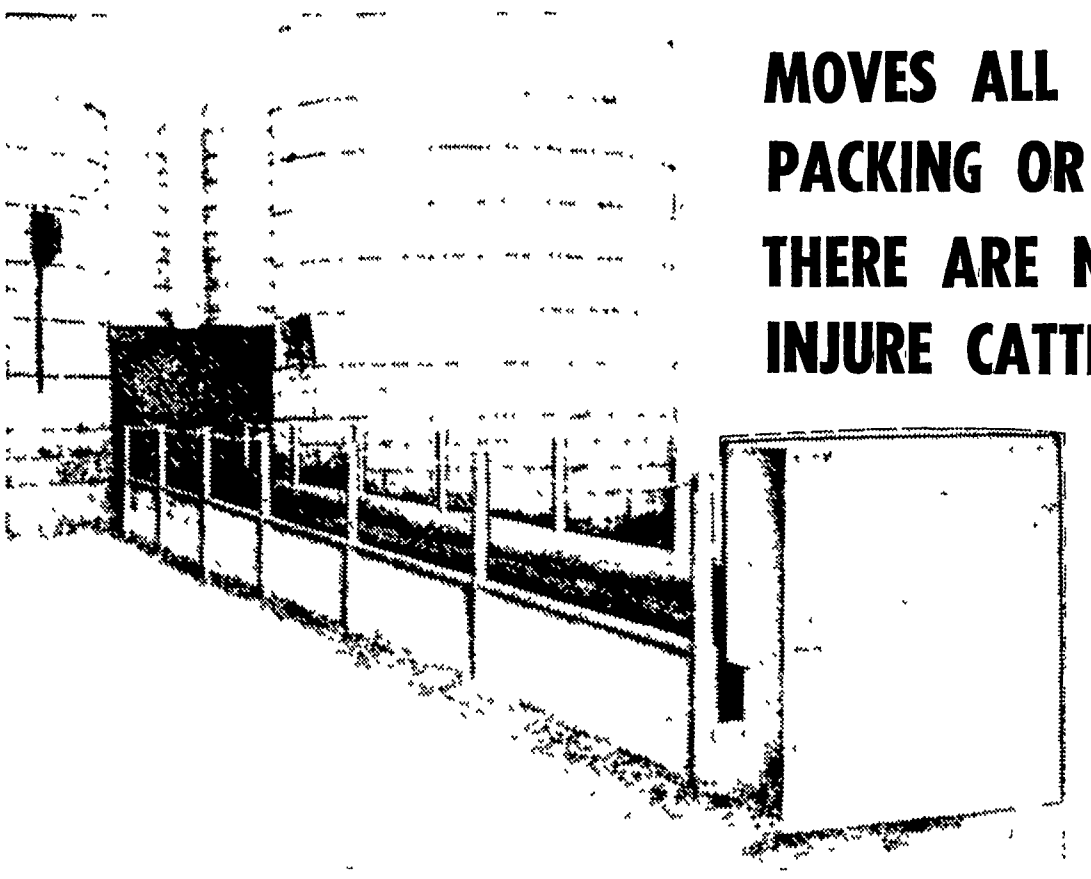
# Big Dutchman® MAGIC CARPET



**MOVES ALL TYPES OF FEED WITHOUT PACKING OR JAMMING... THERE ARE NO AUGERS TO INJURE CATTLE OR THE OPERATOR... AND THE DESIGN IS SIMPLE ENOUGH THAT A FARMER CAN MAINTAIN IT HIMSELF WITH ORDINARY TOOLS.**

## FEED FROM A SILO OR WAGON...

Magic Carpet is designed to be used in practically any type of feeding system. Loads from your silo or directly from the chopper wagon. Now you can enjoy the benefits of bunk feeding year 'round.

The most popular application for Big Dutchman Magic Carpet is with silo feeding. Feed drops down the chute onto the carpet and is drawn down the bunk, smoothly and without grinding action. If you feed the grain with forage, you can mix it onto the bunk . . . from one end.

## FEATURING...

### SELF CLEANING...

This is the only bunk feeder ever developed that automatically cleans itself. As the carpet is drawn back, it pulls uneaten particles with it. You simply scrape them out at the return end. Feed in a clean bunk every time.

### CONTROL UNIT...

Carpet direction control is determined by a special three position manual control switch. The entire feeding operation is controlled at one end of the bunk. Quantity of feed delivered is determined by the speed of the carpet (5½ feet per minute is standard).

### AUTOMATIC SHUT OFF

When the carpet reaches the end of the bunk, a special "trip-switch" automatically shuts off the power unit. No more "guess work" about when the feeding cycle is over. Galvanized metal construction assures years of dependable service.

### POWER UNIT...

Material is loaded on the carpet as it is being drawn toward the drive unit. Horsepower requirement is low . . . one H.P. motor for 100 ft. bunk. The entire drive assembly, motor gear reducer and cable drums are covered by heavy duty housing with door for easy entry.
